PERSONAL STATEMENT

I am a dedicated, dependable team member with strong interpersonal skills that allow me to flourish within a team and go the extra mile with clients. I use my intelligence to further business goals and am not afraid to think on the job.

TECHNICAL EXPERIENCE

HTML & CSS	AJAX	Adobe Photoshop
XHTML	MongoDB	Adobe Illustrator
Javascript &	Mongoose	Color theory
Jquery	Express	User Experience Design
AngularJS	PostgreSQL	Customer Service
NodeJS	Git	
Ruby	Heroku	

PROJECTS

Tic-Tac-Toe
My goal in creating this game was to make a beautiful but frustrating game of tic tac toe. I had a lot of fun coming up with different animations, as well as creating a attractive, functional static page. As I continue to work on this project I plan on splitting it into two modes, easy and hard. I used HTML/CSS and jQuery for this front-end application.

Crosshatch
My website is called Crosshatch and it is an interactive site for people who love crafting and being creative. Users can post and access DIY Project instructions. I used HTML/CSS, jQuery and AJAX on my front end and Ruby on Rails as my back end.

MCC Content Management System
It is a content management system where users can create accounts, upload files and see them on their profile. They can also see tags associated with their files. This project uses HTML/CSS, jQuery, AJAX in the front end and Node.js, mongoose and express in the back end and withmongoDB and PostgreSQL databases.

Internet History
This app is a timeline of the history of the internet. From its beginnings in 1966 up to present day this website displays important events and the most popular websites of the year. This project uses HTML/CSS and AngularJS on the front end with a Ruby on Rails back end and a PostgreSQL database.

EDUCATION

From June 2015 to September 2015
Web Development Immersive
General Assembly, Boston MA

From January 2015 to Present
